PROFILE

I am a highly motivated and passionate Building Design student, looking to expand my skills. I have strong interpersonal skills, resulting from my experience in collaborative projects at Swinburne University, as well as previous work experience and high-level sporting clubs, and school teams I have been part of. These roles have allowed me to become a punctual, organized and collaborative individual who values and thrives in a team driven work environment. I have learned highly technical skills, as well as critical thinking. These include interpreting client briefs, extracting key points and client expectations and designing buildings which functionally suit the brief, as well as displaying compliance with current standards and building codes in design and construction. I have also developed advanced public speaking skills, through delivering several client presentations to stakeholders, clearly highlighting key selling points, specific client expectations, and compliance with the National Construction Code and Australian Standards.

I have practical experience in CAD and BIM workflows, specifically AutoCAD and Revit software, as well as rendering software used to implement and develop sustainable, design-compliant solutions.

DESIGN PROJECTS

- **Rosebud proposed residential beach house**
 - Using Revit, Twinmotion rendering software
- **Henry Street proposed single storey residential dwelling (Collaborative)**
 - Using Revit, Twinmotion rendering software
- **Church Street proposed mixed use complex**
 - Using Revit, Twinmotion rendering software, and Autodesk Forma
- **Norton Road proposed mixed use warehouse-office (Collaborative)**
 - Using Revit, Twinmotion rendering software
